FUJITSU Interstage XWand selected as XBRL Processing Engine for BOARD International Financial Consolidation system (BOARD FC4)

KRAKÓW – January 10, 2019 – Fujitsu, leading provider of XBRL solutions, today announced that comprehensive, market tested, taxonomy agnostic XBRL software offering, FUJITSU Software Interstage XWand, is included in the latest version of BOARD Financial Consolidation (BOARD FC), a solution to the consolidation and reporting requirements of international groups of companies, which is implemented worldwide by over 200 organizations. BOARD FC combines powerful, out of the box capabilities with the flexibility of a toolkit approach, delivering the unparalleled ability to customize and adapt the financial consolidation process to a company's changing business requirements.

Interstage XWand supports efficient development and delivery of state-of-the-art, end-user-driven specific XBRL capabilities in areas such as extension, mapping, tagging, generation, validation, rendering, visualization and creation of financial statements and regulatory filings, in electronic format and in accordance with XBRL standards. Interstage XWand is the product of Fujitsu's pioneering efforts to evolve the XBRL standard. With advanced technological capabilities, superior performance and strict standards compliance, the Fujitsu XBRL engine has been deployed by financial institutions, software and service providers, National Competent Authorities (NCAs) and companies in over 50 countries worldwide. The adoption by BOARD International for XBRL and Inline XBRL reporting supports Fujitsu's reputation as a leader in this increasingly important field, as regulatory compliance requirements around the world continue to grow more complex and are more stringently enforced among enterprises.

"The growing worldwide acceptance of XBRL, coupled with the ever-increasing need for an integrated, reliable performance management and reporting solution, led us to the creation of this long term, strategic partnership with Fujitsu to incorporate Interstage XWand into BOARD FC. Our joint value-proposition will allow our customers to streamline and automate the XBRL filing process. We selected Fujitsu's software because it is one of very few on the market that allows efficient XBRL processing purely in-memory, i.e. without intermediary formats, and enables both a 'bolt-on' implementation and seamless integration with our platform. We are pleased to offer our customers the exceptional functionality of Interstage XWand, a solution that we consider to be the most complete XBRL Processing Engine on the market today," said Pietro Ferrari, Chief Technology Officer at BOARD International.

“Fujitsu is very pleased to provide the XBRL and iXBRL capabilities of Interstage XWand to the BOARD Financial Consolidation system and its customers. Fujitsu prides itself in being at the forefront of innovation and we share with BOARD International the same passion for delivering reporting solutions which are second to none, provide unique features, reliability, performance and leverage customers’ compliance with reporting mandates.

Our significant investment in software research and development and participation in the various working groups involved with building the enhancements to the XBRL specification (as a Direct Member and Sustaining Partner of XBRL International) gives our partners confidence that they will be equipped with highly scalable (certified by XBRL International) XBRL solutions that will address their current and future needs.

Based on our success, we look forward to continuing to provide the best-in-class solutions that help solve those needs”, said Sławomir SKRZYPEK, Business Development Director at FQS Poland Ltd (EMEA Center of Excellence for Fujitsu XBRL Solutions).

About Fujitsu
